

UV Flatbed Printer Sunjet 90x60

Key Features:

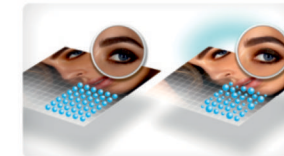

Sunjet Specifications:

Technical Parameter	
Model	Sunjet 90x60
Printhead	RICOH Gh2220 Industrial Print Head
Print width	90*60cm (Max 92*62cm)
Heads number	2 & 3 & 4 or 4 & 5 & 6
Speed	4 head (C+W+V) (if additional head install speed may vary)
Production mode	3.0m ² /h*
Precision mode	2.5m ² /h*
High precision	2.0m ² /h*
Maximum Resolution	720 x 2700 dpi
Print height	1 mm to 80mm adjustable
Ink	4 color (CMYK) + white+ varnish
Printing types	Glass, Acrylic, Wood, MDF, Metal, Leather and so on
Data Interface	USB2.0 high speed interface transfer system
Working Environment	Temperature: 20C-25C Humidity: 40%-60%
Power	50-60Hz 1500W-2200W AC220V(+/-10%)
Operating Systems	Windows 10 64bit, Windows 11 64bit
Printer Dimension & Weight	1780mm*1500mm*1320mm Gross Wt.400kg Net Wt. 300kg

*speed may vary on layer printing

Print Sharpness Quality

Goldtech UV flatbed printers can separately control droplet size for process color management (PCM), this capability is useful for high quality photo printing, printing effect showing very sharp.

Key Features:

- Automatic stirring system for white ink and lacking ink alarming system.
- Making sure non-stop working. Together with alarm function for ink shortage.
- White ink channel on or off optional and output percentage adjustable, make printing more vividly and saturation.
- Carriage height could reach to 8cm and it can work on 6 heads by varnish + white+color, Print speed faster, and control easier.
- Highly integration control software with non-stop working function, easy to read and add print file during printing.
- We use Negative Pressure System for No head clogged & Automatic height sensor for better measurement.
- Media crash sensor protect print head from any over size material.
- Also use Vacuum Bed with Center hole for better suction.
